

## BASIC WASTEWATER PRETREATMENT SYSTEM

Most communities now have strict ordinances regarding the discharge of non-domestic wastewater into the sewer system. Regulations often require monitoring of pH on a continuous basis. Users are often required to pretreat their wastewater with an effective pH control system. Are you in compliance with your local ordinances? J.L. Wingert specializes in water and wastewater pretreatment equipment. The expertise of our sales staff, combined with our large inventory of pumps, tanks, mixers, and monitoring instrumentation can provide prompt and economical solutions to your wastewater problems.

System shown is an example of a typical wastewater pretreatment system. For specific details regarding your needs, please contact J.L. Wingert.
